Height Adjustable Table Guide Info

How To Program Table Height Preset Buttons

MEMORY BUTTON FACTORY SETTINGS

The Programmable Switch is pre-programmed from the factory at the following heights:

- Button 1  preset at 26" – Seated work surface height for the average female.
- Button 2  preset at 28" – Seated work surface height for the average male.
- Button 3  preset at 42" – Average standing counter height.

REPROGRAMMING MEMORY BUTTONS

All three memory buttons can be reprogrammed to your preferred height settings.

1. Use ▲ and ▼ button to move the workcenter to the height to be saved to memory.
2. Press and release the **SET** button ("S" will appear on the screen.)
3. Select and press a memory button to save. The letter "S" and the number of the memory button selected will flash for 2 seconds confirming memory has been set.

Repeat this process for each additional memory button you want to reprogram.

MOVE TO A MEMORY HEIGHT

Press and hold continuously button , , or  until the workcenter stops at the preset height.

Setting Custom Height Limits:

The custom height limit feature protects the workcenter from colliding with items placed above or below the worksurface such as overhanging shelves or pedestals below.

Set Lower Limit:

1. Move your workcenter to the desired lower limit (Leave a 1" minimum space between the worksurface and the object below the workcenter for safety.)
2. Press the **SET** and ▼ buttons simultaneously for 2 seconds. The display shows **L0** and the lower limit is set.

Set Upper Limit:

1. Move your workcenter to the desired upper limit (Leave a 1" minimum space between the worksurface and the object above the workcenter for safety.)
2. Press the **SET** and ▲ buttons simultaneously for 2 seconds. The display shows **H1** and the upper limit is set.

Remove Custom Height Limits:

1. Press **SET**, ▲ and ▼ buttons simultaneously for 4 seconds. The display shows **CLR** to indicate height limits have been removed.
